CAREER OBJECTIVE

BCA graduate with hands-on experience in Python, JavaScript, React, REST APIs, FastAPI, and PostgreSQL. Seeking a Software Engineer role where I can apply my programming and problem-solving skills, contribute to building reliable and scalable software solutions, and continue growing as a developer.

PROFESSIONAL QUALIFICATION

- Bachelor of Computer Applications (BCA) Shri Sukhmani Institute of Hospitality & Management, Derabassi
- CGPA: 8.48/10 | Completed: July 2026

ACADEMIC QUALIFICATION

- 12th — Bihar School Examination Board | 2021 | 72%
- 10th — Bihar School Examination Board | 2019 | 69%

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL
Backend Technologies: FastAPI, REST APIs
Databases: PostgreSQL, MySQL
Frontend Technologies: JavaScript, React, HTML5, CSS3
Tools: Git, GitHub, VS Code, Swagger

INTERNSHIP EXPERIENCE

Python Backend Developer Intern — Bright Infotech

- Developed **REST APIs and CRUD operations** using Python for backend application functionality.
- Worked on **database integration** to store and retrieve application data.
- Tested API functionality, identified issues, and performed **debugging** to improve reliability.
- Gained practical experience in backend development, API development, and database-driven applications.

AI/ML Intern (6 Weeks) — THINKNEXT Technologies

- Worked with **Pandas and NumPy** for data processing and basic data analysis tasks.
- Performed data manipulation and preparation using Python-based data processing libraries.
- Gained practical exposure to **fundamental AI/ML concepts** and their applications.
- Developed an understanding of basic data-processing workflows used in AI/ML projects.

PROJECTS

Student Wellbeing & Grooming Checker

- Developed an AI-based application to analyze students' emotional wellbeing and grooming compliance from uploaded images.
- Built backend REST APIs using **Python and FastAPI** to handle image uploads and analysis requests.
- Implemented the API workflow for receiving images, processing analysis requests, and returning results.
- Built a responsive **React** frontend using JavaScript and connected it to the FastAPI backend to upload images and display analysis results.

RAG (Retrieval-Augmented Generation) System

- Developed a basic **RAG system using Python** for retrieving relevant information from user-provided documents.
- Implemented document processing and **text chunking** to divide documents into smaller, manageable sections.
- Built the retrieval and response-generation workflow to provide answers based on relevant document content.

Subject Management API

- Developed a backend **REST API using Python and PostgreSQL** for managing academic subjects.
- Implemented complete **CRUD operations** to create, retrieve, update, and delete subject records.
- Integrated the API with PostgreSQL for persistent data storage and tested API endpoints using **Swagger**.

CERTIFICATIONS

- Blackbird Software Engineering Job Simulation — Forage | Oct 2026 (React login form with validation and Jest tests)
- AI/ML Using Python — THINKNEXT Technologies Private Limited
- ADCA (Advanced Diploma in Computer Applications) — I-MAS Computer Education
